

AIM: MapReduce code for Mapper.

1. vi reducer.py:

OUTPUT:

```
#!/user/bin/env python
import sys
current_word = None
current_count = 0
for line in sys.stdin:
    line = line.strip()
    word,count = line.split()
    try:
        count = int(count)
    except ValueError:
        continue
    if current_word == word:
        current_count += count
    else:
        if current_word:
            print('%s\t%s'%(current_word,current_count))
            current_word = word
            current_count = count
        if current_word == word:
            print('%s\t%s'%(current_word,current_count))
```

2. cat sw. txt | python mapper.py | sort -k 1,1 | python reducer.py:

OUTPUT:

```
[cloudera@quickstart ~]$ cat sw.txt | python mapper.py | sort -k 1,1 | python reducer.py
cloudera      1
Welcome 1
```
