

Aim: Socket Programming.**1. Write a java program to demonstrate socket programming.****CODE:****SERVER CODE:**

```
import java.io.*;
import java.net.*;

public class Server{
    public static void main(String args[]) throws Exception{
        ServerSocket ss = new ServerSocket(3333);
        Socket s = ss.accept();
        DataInputStream dis = new DataInputStream(s.getInputStream());
        DataOutputStream dos = new DataOutputStream(s.getOutputStream());
        BufferedReader br = new BufferedReader(new InputStreamReader(System.in));
        String s1 = "", s2 = "";
        while(!s1.equals("stop")){
            s1 = dis.readUTF();
            System.out.println("Client: " + s1);
            s2 = br.readLine();
            dos.writeUTF(s2);
            dos.flush();
        }
        dis.close();
        s.close();
    }
}
```

CLIENT CODE:

```
import java.net.*;
import java.io.*;

public class Client {
    public static void main(String[] args) throws Exception{
        Socket s = new Socket("localhost",3333);
        DataInputStream dis = new DataInputStream(s.getInputStream());
        DataOutputStream dos = new DataOutputStream(s.getOutputStream());
        BufferedReader br = new BufferedReader(new InputStreamReader(System.in));
        String s1 = "", s2 = "";
        while(!s1.equals("stop")){
            s1 = br.readLine();
            dos.writeUTF(s1);
            dos.flush();
            s2 = dis.readUTF();
            System.out.println("Server: " +s2);
        }
        dos.close();
        s.close();
    }
}
```

OUTPUT:**SERVER OUTPUT:**

```
C:\Users\ROHIT\OneDrive\Desktop\Java Programs>java Server
```

```
Client: Hello
```

```
Hi! There
```

```
Client: So is this how it work?
```

```
Yes, sir
```

CLIENT OUTPUT:

```
C:\Users\ROHIT\OneDrive\Desktop\Java Programs>java Client
```

```
Hello
```

```
Server: Hi! There
```

```
So is this how it work?
```

```
Server: Yes, sir
```
