

Aim: To run a simple servlet program.

Following are the steps to run a simple Hello World servlet program in Tomcat:

1.Link to download servlet jar:

<https://repo1.maven.org/maven2/jakarta/servlet/jakarta.servlet-api/6.1.0/>

File Name	Date	Time	Size
jakarta.servlet-api-6.1.0-cyclonedx.json	2024-05-24	17:35	3569
jakarta.servlet-api-6.1.0-cyclonedx.json.asc	2024-05-24	17:35	833
jakarta.servlet-api-6.1.0-cyclonedx.json.md5	2024-05-24	17:35	32
jakarta.servlet-api-6.1.0-cyclonedx.json.sha1	2024-05-24	17:35	40
jakarta.servlet-api-6.1.0-cyclonedx.xml	2024-05-24	17:35	3074
jakarta.servlet-api-6.1.0-cyclonedx.xml.asc	2024-05-24	17:35	833
jakarta.servlet-api-6.1.0-cyclonedx.xml.md5	2024-05-24	17:35	32
jakarta.servlet-api-6.1.0-cyclonedx.xml.sha1	2024-05-24	17:35	40
jakarta.servlet-api-6.1.0-javadoc.jar	2024-05-24	17:35	1084618
jakarta.servlet-api-6.1.0-javadoc.jar.asc	2024-05-24	17:35	833
jakarta.servlet-api-6.1.0-javadoc.jar.md5	2024-05-24	17:35	32
jakarta.servlet-api-6.1.0-javadoc.jar.sha1	2024-05-24	17:35	40
jakarta.servlet-api-6.1.0-sources.jar	2024-05-24	17:35	487123
jakarta.servlet-api-6.1.0-sources.jar.asc	2024-05-24	17:35	833
jakarta.servlet-api-6.1.0-sources.jar.md5	2024-05-24	17:35	32
jakarta.servlet-api-6.1.0-sources.jar.sha1	2024-05-24	17:35	40
jakarta.servlet-api-6.1.0.jar	2024-05-24	17:35	398424
jakarta.servlet-api-6.1.0.jar.asc	2024-05-24	17:35	833
jakarta.servlet-api-6.1.0.jar.md5	2024-05-24	17:35	32
jakarta.servlet-api-6.1.0.jar.sha1	2024-05-24	17:35	40
jakarta.servlet-api-6.1.0.pom	2024-05-24	17:35	19100
jakarta.servlet-api-6.1.0.pom.asc	2024-05-24	17:35	833
jakarta.servlet-api-6.1.0.pom.md5	2024-05-24	17:35	32
jakarta.servlet-api-6.1.0.pom.sha1	2024-05-24	17:35	40

2.Link to download Tomcat version 11: <https://tomcat.apache.org/download-11.cgi>

11.0.11

Please see the [README](#) file for packaging information. It explains what every distribution contains.

Binary Distributions

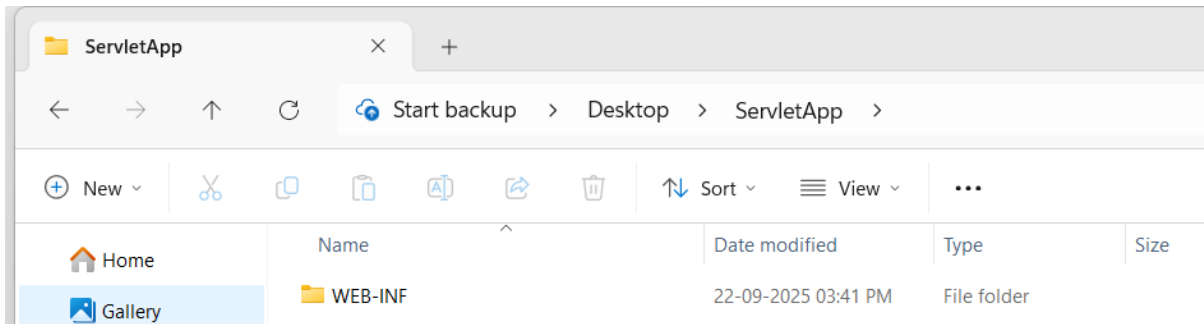

- Core:
 - [zip \(pgp, sha512\)](#)
 - [tar.gz \(pgp, sha512\)](#)
 - [Windows zip \(pgp, sha512\)](#)
 - [Windows Service Installer \(pgp, sha512\)](#)
- Full documentation:
 - [tar.gz \(pgp, sha512\)](#)
- Deployer:
 - [zip \(pgp, sha512\)](#)
 - [tar.gz \(pgp, sha512\)](#)
- Embedded:
 - [tar.gz \(pgp, sha512\)](#)
 - [zip \(pgp, sha512\)](#)

3.Download the tomcat and then unzip it.

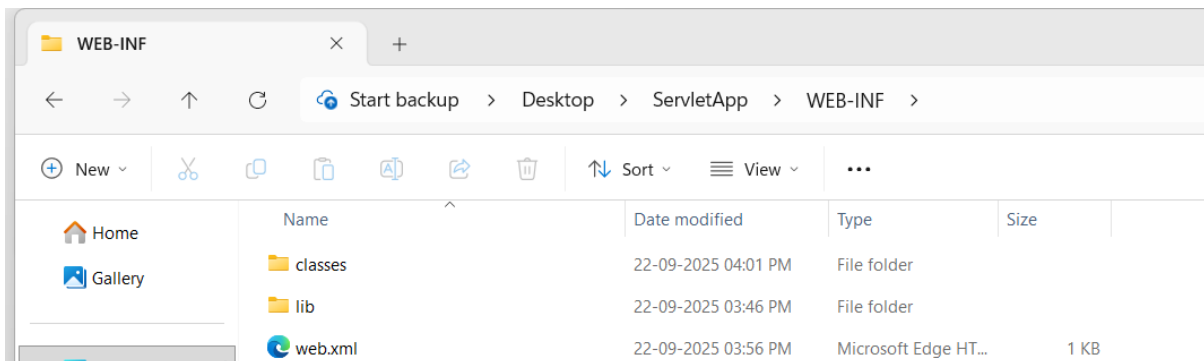

4.In your desktop create a folder.

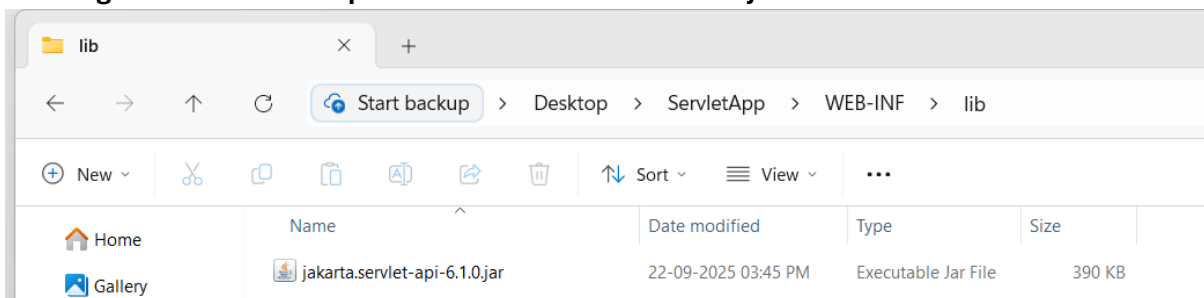

5.Go to that folder and then create WEB-INF folder.

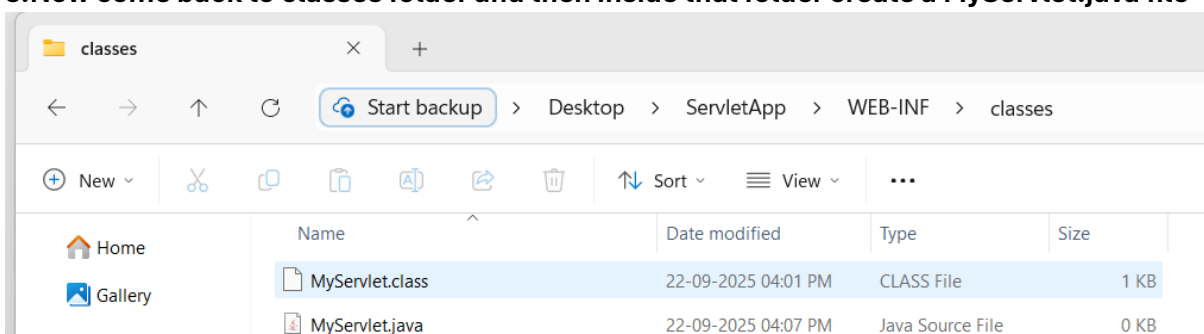

6.Go to WEB-INF folder and then create two more folder i.e classes and lib. Also create one web.xml file.

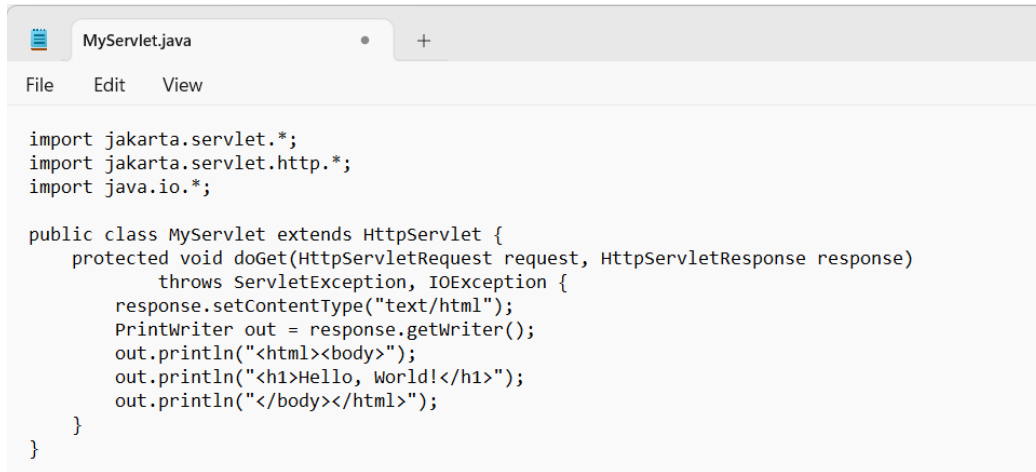

7.Now go to lib folder and paste the downloaded servlet jar file.

8.Now come back to classes folder and then inside that folder create a MyServlet.java file

9.Write the following code inside the MyServlet.java file using vscode or notepad.

```

import jakarta.servlet.*;
import jakarta.servlet.http.*;
import java.io.*;

public class MyServlet extends HttpServlet {
    protected void doGet(HttpServletRequest request, HttpServletResponse response)
        throws ServletException, IOException {
        response.setContentType("text/html");
        PrintWriter out = response.getWriter();
        out.println("<html><body>");
        out.println("<h1>Hello, World!</h1>");
        out.println("</body></html>");
    }
}

```

CODE:

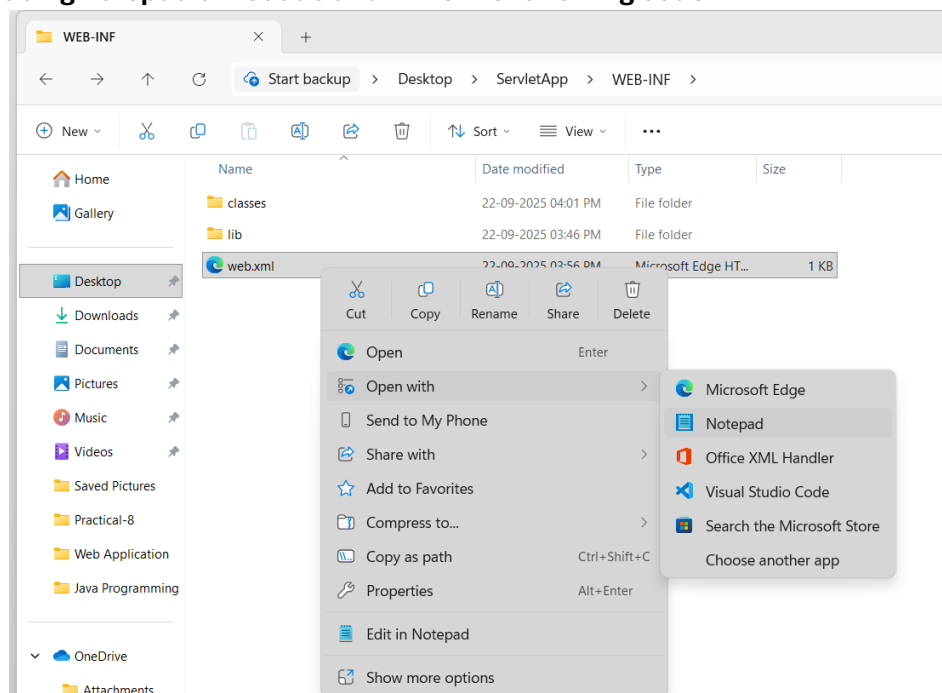

```

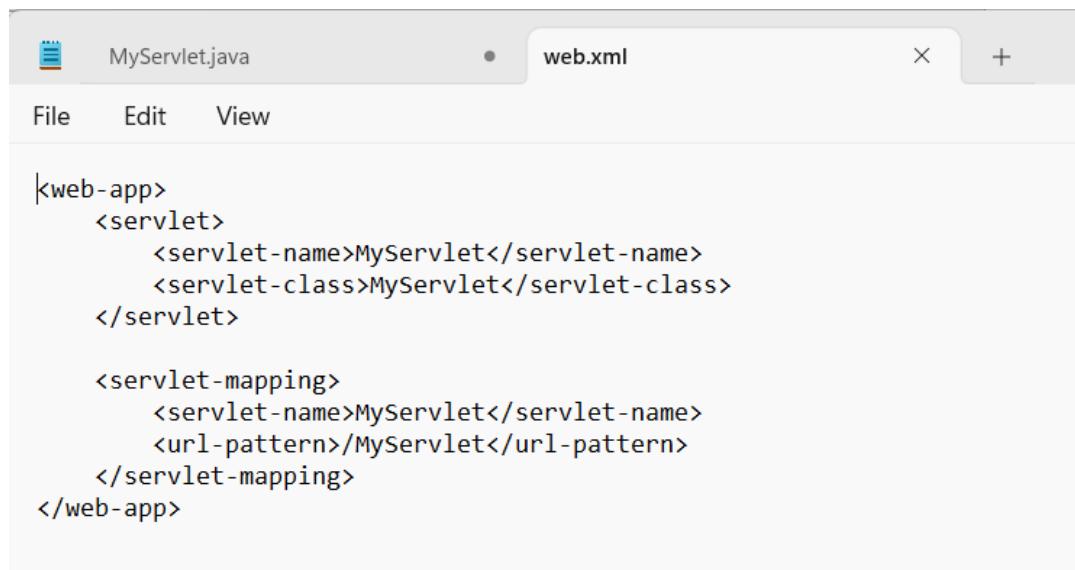

import jakarta.servlet.*;
import jakarta.servlet.http.*;
import java.io.*;

public class MyServlet extends HttpServlet {
    protected void doGet(HttpServletRequest request, HttpServletResponse response)
        throws ServletException, IOException {
        response.setContentType("text/html");
        PrintWriter out = response.getWriter();
        out.println("<html><body>");
        out.println("<h1>Hello, World!</h1>");
        out.println("</body></html>");
    }
}

```

10. Now inside the WEB-INF folder the xml file that is created earlier i.e web.xml open it either by using notepad or vscode and write the following code.

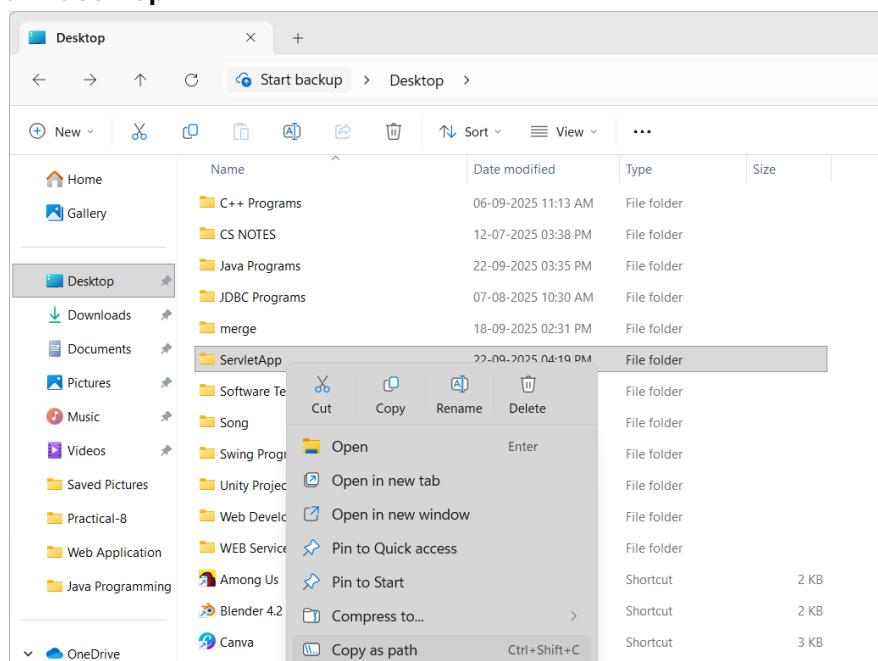

**CODE:**

```
<web-app>
  <servlet>
    <servlet-name>MyServlet</servlet-name>
    <servlet-class>MyServlet</servlet-class>
  </servlet>

  <servlet-mapping>
    <servlet-name>MyServlet</servlet-name>
    <url-pattern>/MyServlet</url-pattern>
  </servlet-mapping>
</web-app>
```

11. Now open your cmd and then change the path to the ServletApp folder path that you have created in desktop.

```

Command Prompt

Microsoft Windows [Version 10.0.26100.6584]
(c) Microsoft Corporation. All rights reserved.

C:\Users\ROHIT>cd "C:\Users\ROHIT\OneDrive\Desktop\ServletApp"

```

12. Then write the following line: **javac -cp .;WEB-INF\lib\jakarta.servlet-api-6.1.0.jar -d WEB-INF\classes WEB-INF\classes\MyServlet.java** this will compile the servlet.

```

Command Prompt

Microsoft Windows [Version 10.0.26100.6584]
(c) Microsoft Corporation. All rights reserved.

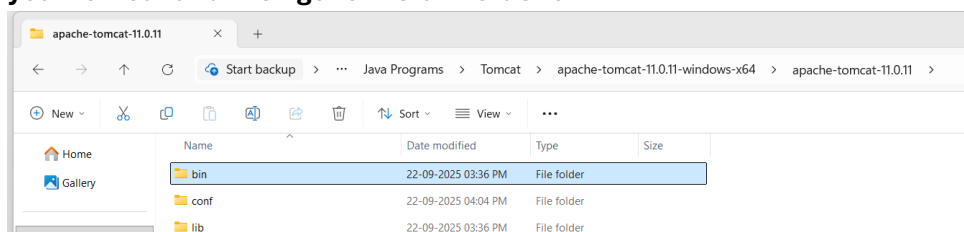

C:\Users\ROHIT>cd "C:\Users\ROHIT\OneDrive\Desktop\ServletApp"

C:\Users\ROHIT\OneDrive\Desktop\ServletApp>javac -cp .;WEB-INF\lib\jakarta.servlet-api-6.1.0.jar -d WEB-INF\classes WEB-INF\classes\MyServlet.java

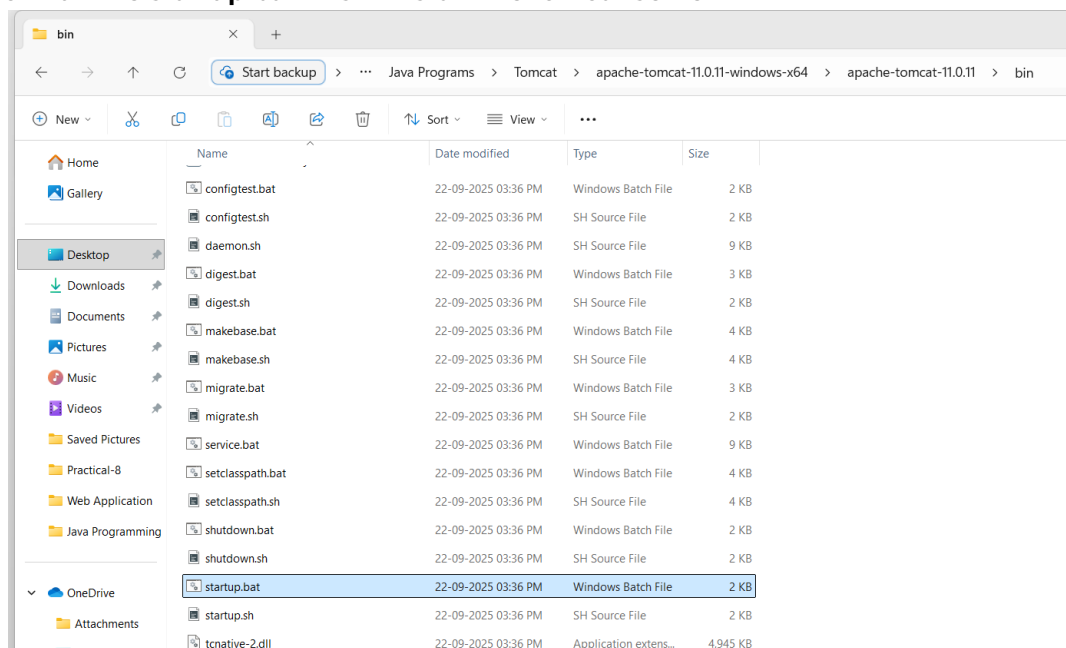

C:\Users\ROHIT\OneDrive\Desktop\ServletApp>

```

13. Open your tomcat and then go to the bin folder of it.

14. Now run the startup.bat this will start the tomcat server.

OUTPUT:

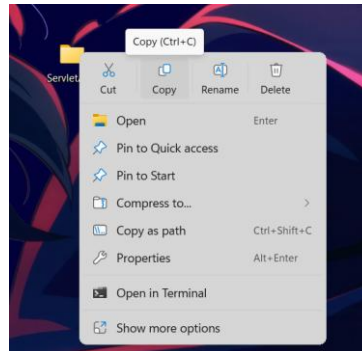

```

Tomcat

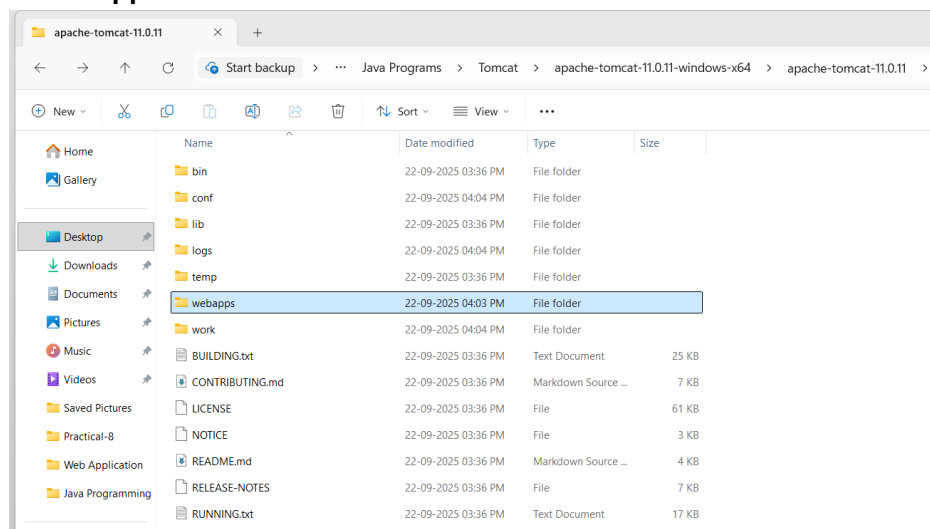

22-Sep-2025 16:04:09.660 INFO [main] org.apache.catalina.startup.HostConfig.deployDirectory Deploying web application directory [C:\Users\ROHIT\OneDrive\Desktop\Java Programs\Tomcat\apache-tomcat-11.0.11-windows-x64\apache-tomcat-11.0.11-windows-x64\apps\host-manager]

```

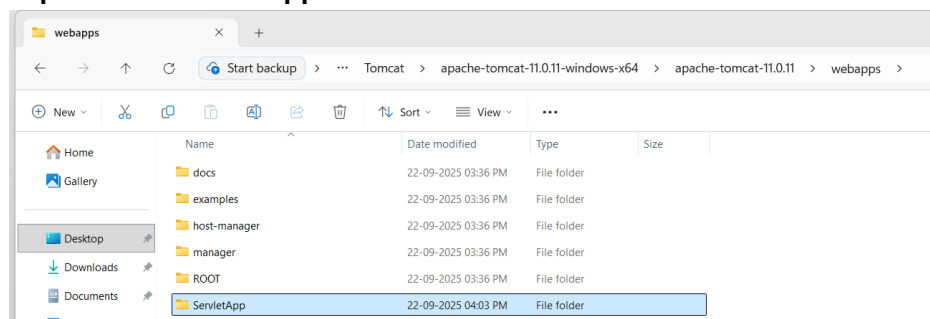

15. Now copy your Myservlet folder from the desktop.

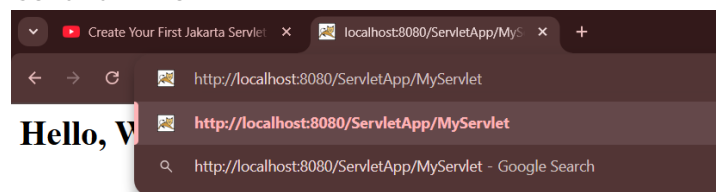

16. Go to the webapps folder in tomcat.

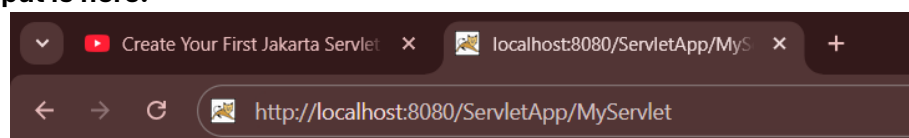

17. And then paste the ServletApp folder in it.

18. Go to your browser and write:

19. The output is here!

Hello, World!
