

Aim: Create a media player application in android that plays audio. Implement play, pause, and stop features.

MainActivity.kt CODE:

```
package com.rohit.practical7a
import android.media.MediaPlayer
import android.os.Bundle
import android.widget.Button
import androidx.appcompat.app.AppCompatActivity
class MainActivity : AppCompatActivity() {
    private lateinit var mediaPlayer: MediaPlayer
    override fun onCreate(savedInstanceState: Bundle?) {
        super.onCreate(savedInstanceState)
        setContentView(R.layout.activity_main)
        // Initialize MediaPlayer
        mediaPlayer = MediaPlayer.create(this, R.raw.song)
        // Register buttons
        val bPlay: Button = findViewById(R.id.playButton)
        val bPause: Button = findViewById(R.id.pauseButton)
        val bStop: Button = findViewById(R.id.stopButton)
        // Play audio
        bPlay.setOnClickListener {
            if (!mediaPlayer.isPlaying) {
                mediaPlayer.start()
            }
        }
        // Pause audio
        bPause.setOnClickListener {
            if (mediaPlayer.isPlaying) {
                mediaPlayer.pause()
            }
        }
        // Stop audio
        bStop.setOnClickListener {
            if (mediaPlayer.isPlaying) {
                mediaPlayer.stop()
                mediaPlayer.prepare()
            }
        }
    }
    override fun onDestroy() {
        super.onDestroy()
        mediaPlayer.release()
    }
}
```

For audio: app → src → main → res → Right-click on res → New → Android Resource Directory → Resource type: raw → Click OK → Copy your audio file song.mp3 → Paste it inside the raw folder → res/raw/song.mp3

Main_Activity.xml CODE:

```
<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity"
    tools:ignore="HardcodedText">
    <TextView
        android:id="@+id/headingText"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_centerHorizontal="true"
        android:layout_marginTop="32dp"
```

```

        android:text="MEDIA PLAYER"
        android:textSize="18sp"
        android:textStyle="bold" />
<LinearLayout
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:layout_below="@id/headingText"
    android:layout_marginTop="16dp"
    android:gravity="center_horizontal">
    <Button
        android:id="@+id/stopButton"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginEnd="8dp"
        android:backgroundTint="#F44336"
        android:text="STOP"
        android:textColor="@android:color/white" />
    <Button
        android:id="@+id/playButton"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginEnd="8dp"
        android:backgroundTint="#4CAF50"
        android:text="PLAY"
        android:textColor="@android:color/white" />
    <Button
        android:id="@+id/pauseButton"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:backgroundTint="#03A9F4"
        android:text="PAUSE"
        android:textColor="@android:color/white" />
</LinearLayout>
</RelativeLayout>

```

OUTPUT:
