

Aim: GPIO: Light the LED with Python.

CODE:

```
import RPi.GPIO as GPIO
import time
GPIO.setmode(GPIO.BOARD)
GPIO.setup(38,GPIO.OUT)
for i in range(10):
    GPIO.output(38,True)
    print("LED IS FINALLY ON")
    time.sleep(1)
    GPIO.output(38,False)
    print("LED IS OFF")
    time.sleep(1)
print("PRINT PROGRAM COMPLETE!")
GPIO.cleanup()
```

OUTPUT:
