

Aim: Load testing using JMeter, Android Application testing using Appium Tools, Bugzilla.

1.Download JMeter.

Apache JMeter 5.6.3 (Requires Java 8+)

Binaries

[apache-jmeter-5.6.3.tgz](#) [sha512](#) [pgp](#)

[apache-jmeter-5.6.3.zip](#) [sha512](#) [pgp](#)

2.Extracting and running the JMeter.

The screenshot displays the process of downloading and running Apache JMeter 5.6.3. It is divided into two main sections: a file explorer view of the extracted files and a terminal window showing the command-line execution, followed by the JMeter GUI.

File Explorer View:

File/Folder	Date/Time	Type	Size
apache-jmeter-5.6.3	16-12-2025 04:38	File folder	
apache-jmeter-5.6.3	16-12-2025 04:15	WinRAR ZIP archive	88,508 KB
bin	16-12-2025 04:16	File folder	
docs	02-01-2024 16:44	File folder	
jaas.conf	05-05-2023 13:21	CONF File	2 KB
jmeter	05-05-2023 13:21	File	9 KB
jmeter	05-05-2023 13:21	Windows Batch File	9 KB
jmeter	16-12-2025 04:16	Text Document	2 KB
jmeter.properties	04-07-2023 10:41	PROPERTIES File	58 KB
jmeter.sh	05-05-2023 13:21	SH File	5 KB

Terminal Window:

```
C:\WINDOWS\system32\cmd. x + v

=====
Don't use GUI mode for load testing !, only for Test creation and Test debugging.
For load testing, use CLI Mode (was NON GUI):
    jmeter -n -t [jmx file] -l [results file] -e -o [Path to web report folder]
& increase Java Heap to meet your test requirements:
    Modify current env variable HEAP="-Xms1g -Xmx1g -XX:MaxMetaspaceSize=256m" in the jmeter batch file
Check : https://jmeter.apache.org/usermanual/best-practices.html
=====
```

Apache JMeter (5.6.3) GUI:

The GUI window shows the 'Test Plan' tab selected. The 'Test Plan' section has a 'Name' field set to 'Test Plan' and an empty 'Comments' field. Below this is a table for 'User Defined Variables' with columns for 'Name' and 'Value'.

Name	Value
------	-------

3. Creating a thread group and setting it for HTTP Request by providing any of the website.

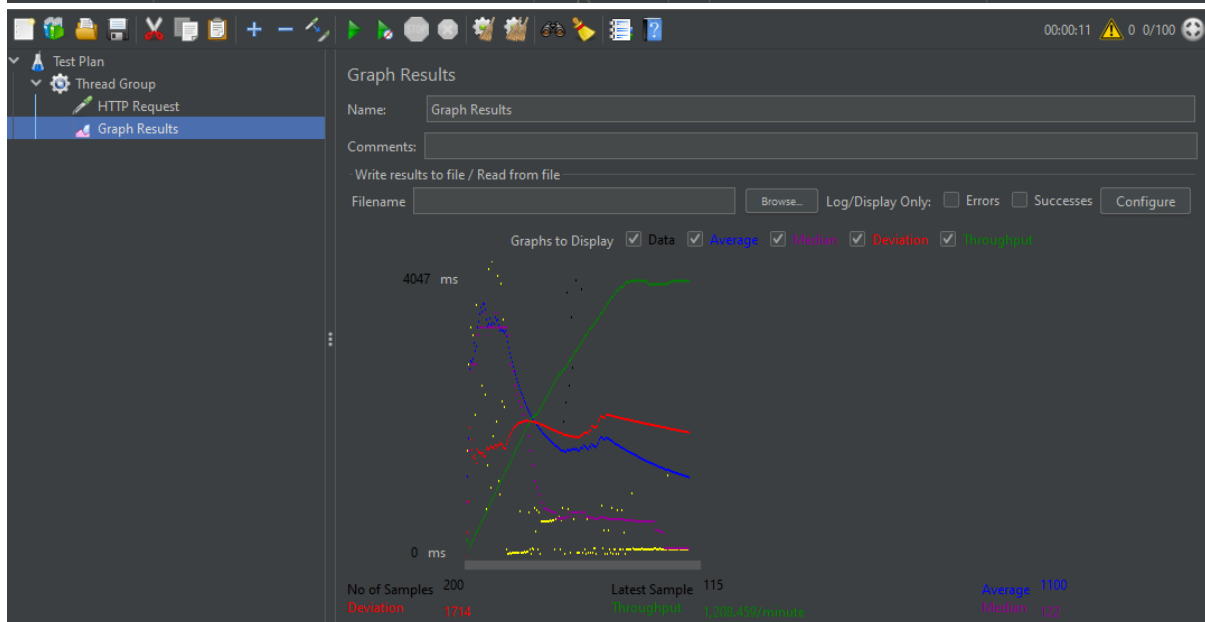

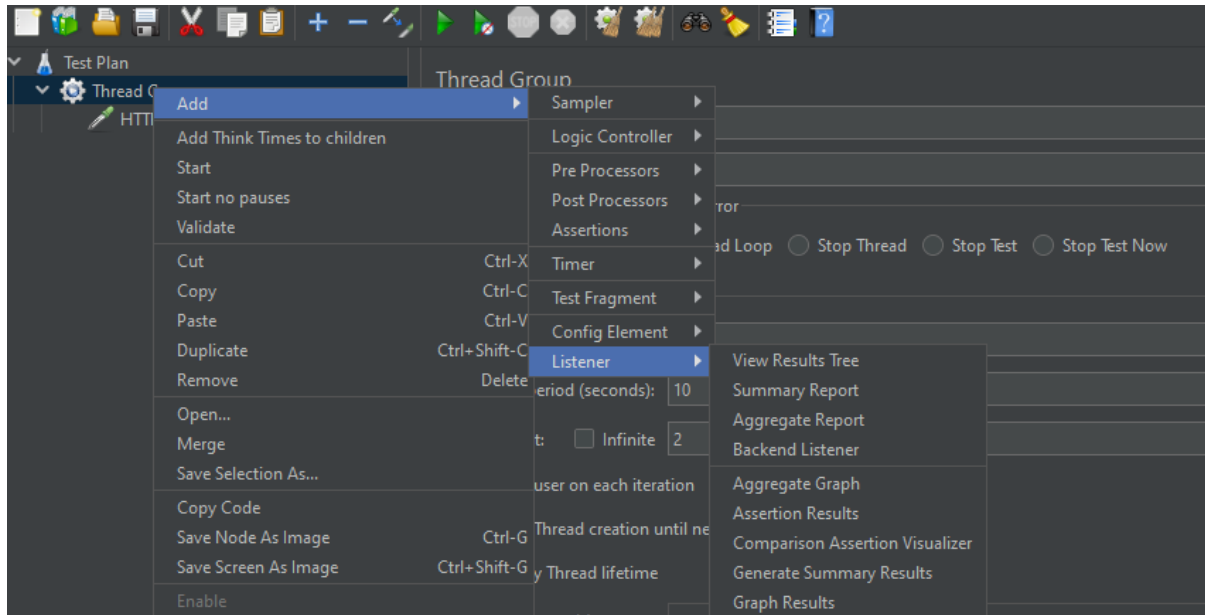

The image shows three sequential screenshots of the Apache JMeter 5.6.3 interface, illustrating the process of creating a thread group and adding an HTTP request.

Top Screenshot: The 'Test Plan' tree on the left shows a 'Thread Group' being added. The 'Add' context menu is open, and the 'Threads (Users)' option is selected. The 'Thread Group' configuration panel on the right is visible, showing fields for Name, Comments, and Thread Properties.

Middle Screenshot: The 'Thread Group' configuration panel is shown. The 'Name' field is set to 'Thread Group'. The 'Thread Properties' section shows 'Number of Threads (users)' set to 100, 'Ramp-up period (seconds)' set to 10, and 'Loop Count' set to 2. The 'Same user on each iteration' checkbox is checked.

Bottom Screenshot: The 'Thread Group' configuration panel is shown. The 'Add' context menu is open, and the 'Sampler' option is selected. The 'HTTP Request' configuration panel is visible, showing fields for Name, Comments, and Basic/Advanced settings. The 'Basic' tab is selected, showing 'Web Server' settings with 'Protocol [http:]' set to 'http', 'Server Name or IP:' set to 'store.steampowered.com/', and 'Port Number' set to '80'. The 'HTTP Request' section shows 'Method' set to 'GET' and 'Path' set to '/'. The 'Parameters' tab is also visible, showing a table for sending parameters with the request.

4. Generating 5 different reports for the specific website.

The screenshot shows the JMeter GUI with the 'Summary Report' selected. The table displays various metrics for the HTTP Request and TOTAL.

Label	# Samples	Average	Min	Max	Std. Dev.	Error %	Throughput	Received KB/sec	Sent KB/sec	Avg. Bytes
HTTP Request	400	117	109	216	8.08	100.00%	5.7/sec	3.24	0.70	584.0
TOTAL	400	117	109	216	8.08	100.00%	5.7/sec	3.24	0.70	584.0

The screenshot shows the JMeter GUI with the 'Aggregate Report' selected. The table displays various metrics for the HTTP Request and TOTAL.

Label	# Samples	Average	Median	90% Line	95% Line	99% Line	Min	Maximum	Error %	Throughput	Received K...	Sent KB/sec
HTTP Requ...	200	118	118	123	124	129	110	213	100.00%	18.7/sec	11.24	2.45
TOTAL	200	118	118	123	124	129	110	213	100.00%	19.7/sec	11.24	2.45
