

Aim: Install Selenium server (Selenium RC) and demonstrate it using a script in Java/PHP.

CODE:

```
package set.prac.pkg2;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.firefox.FirefoxDriver;
import org.openqa.selenium.remote.DesiredCapabilities;
import org.openqa.selenium.firefox.FirefoxOptions;
public class SETPRAC2 {
    static String drivepath="D:\\software\\others\\Gecko\\geckodriver.exe";
    public static WebDriver driver;
    public static void main(String[] args) {
        System.out.println("Selenium Demo");
        System.setProperty("webdriver.gecko.driver","D:\\software\\others\\Gecko\\geckodriver.exe");
        FirefoxOptions options = new FirefoxOptions();
        driver = new FirefoxDriver(options);
        driver.get("http://www.google.com");
        String desiredTitle = "Boogle";
        String actualTitle = "Google";
        actualTitle = driver.getTitle();
        if(actualTitle.contentEquals(desiredTitle))
            System.out.println("Test Passed");
        else
            System.out.println("Test Failed");
        driver.manage().window().maximize();
    }
}
```

OUTPUT:

1.Pass case occurs when the expected page title match the actual title.

```
Output - SET PRAC-2 (run) ×
console.warn: services.settings: Ignoring preference override of remote settings server
console.warn: services.settings: Allow by setting MOZ_REMOTE_SETTINGS_DEVTOOLS=1 in the environment
1765280438965  Marionette      INFO    Marionette enabled
Dynamically enable window occlusion 0
1765280439125  Marionette      INFO    Listening on port 65158
