

Aim: Write and test a program to select the number of students who have scored more than 60 marks in all subjects.

1.Create a workbook on your own add some student info and let the code to create an own edited copy of it with new column.

CODE:

```
import java.io.FileInputStream;
import java.io.FileOutputStream;
import jxl.Sheet;
import jxl.Workbook;
import jxl.write.Label;
import jxl.write.WritableSheet;
import jxl.write.WritableWorkbook;
import org.testng.annotations.Test;

public class practical_6B {
    public practical_6B() {
    }
    @Test
    public void hello() throws Exception {

        try (FileInputStream fi = new FileInputStream("C:\\Users\\ROHIT\\Desktop\\Programming
Files\\Java Programs\\Software Testing Code\\SETCODES\\Student.xls")) {
            Workbook w = Workbook.getWorkbook(fi);
            Sheet s = w.getSheet(0);

            FileOutputStream fo = new FileOutputStream("C:\\Users\\ROHIT\\Desktop\\Programming
Files\\Java Programs\\Software Testing Code\\SETCODES\\Student Edited.xls");
            WritableWorkbook ww = Workbook.createWorkbook(fo);
            WritableSheet ws = ww.createSheet("Edited 1", 0);

            // Add Result header once
            Label header = new Label(6, 0, "Result");
            ws.addCell(header);

            for (int i = 0; i < s.getRows(); i++) {
                for (int j = 0; j < s.getColumns(); j++) {
                    String data = s.getCell(j, i).getContents();
                    Label label = new Label(j, i, data);
                    ws.addCell(label);
                }
            }

            for (int i = 1; i < s.getRows(); i++) {
                String marksStr = s.getCell(2, i).getContents();
                int marks = Integer.parseInt(marksStr);

                if (marks > 60) {
                    ws.addCell(new Label(6, i, "Selected"));
                }
            }
        }
    }
}
```

```

    } else {
        ws.addCell(new Label(6, i, "Not Selected"));
    }
}

wwb.write();
wwb.close();
w.close();
}

System.out.println("Records successfully updated");
}
}

```

OUTPUT:

The screenshot displays an IDE interface with two main windows. The top window, titled 'Output - SETCODES (test)', shows the test results for 'Ant suite X'. It indicates that all tests passed (100.00%) and provides a summary: 'Records successfully updated', 'Command line suite', 'Total tests run: 1, Failures: 0, Skips: 0'. Below this, two tables are shown. The first table lists student records with columns for Roll No, Python, C++, Java, DSA, and DBMS. The second table adds a 'Result' column, showing 'Not Selected' for the first two students and 'Selected' for the third.

The bottom window is a file explorer showing the project structure. It includes a sidebar with navigation options like Home, Gallery, and Rohit - Personal. The main pane displays a list of files and folders, including 'build', 'nbproject', 'src', 'test', 'build.xml', 'chromedriver.exe', 'geckodriver.exe', 'manifest.mf', 'Practical-6.xls', 'Student 1.xls', 'Student Edited.xls', and 'Student.xls'.

	A	B	C	D	E	F	G
1	Roll No	Python	C++	Java	DSA	DBMS	
2	1	50	60	78	45	45	
3	2	43	55	78	60	97	
4	3	70	76	78	78	89	

	A	B	C	D	E	F	G
1	Roll No	Python	C++	Java	DSA	DBMS	Result
2	1	50	60	78	45	45	Not Selected
3	2	43	55	78	60	97	Not Selected
4	3	70	76	78	78	89	Selected
